## **RELIGIOUS EDUCATION**

OVERALL AIM: Through the study of Religious Education we aim to create confident, independent and morally aware pupils who foster a positive understanding and connection to the world to enable them to become active, global citizens.

**ACADEMIC** 

Pupils have opportunities to experience first-hand cultural and religious practices. Pupils apply their knowledge to make informed decisions, foster skills of resilience, research and reflection whilst building a culture of tolerance.

We aim to create a personalised learning environment which allows all pupils to access and reach their potential through a variety of active learning opportunities. We further develop the skills needed to articulate pupils ideas whilst acknowledging and respecting the views of others.

**SOCIAL** 

We help pupils to make sense of cultural diversity and find their place within society.

We instil a passion for constructive debate and questioning and give pupils the skills they need to face challenging situations and show empathy, understanding and compassion to others.
